

Asthma-Friendly Provider 2023 Recertification Application

Name of Healthcare Organization:

Mailing Address:

<i>Street</i>	<i>City</i>	<i>Zip Code</i>	<i>County</i>
<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

Phone (Area Code and Number):

Fax (Area Code and Number):

Specialty:

Number of Staff:

Type of Healthcare Organization:

Do you refer moderate to severe asthma patients to a specialist?

If yes, what type?

Asthma Team Lead's Name:

Asthma Team Lead's Email:

Asthma Team Members (Names and Roles):

Provider's Name:

Provider's Email:

Provider's Attestation:

(Check below, indicate date)

I attest that our practice achieved the criteria level indicated and the information included on the following pages is accurate.

Date:

Mentor/Partner Organization (if applicable):

How did you hear about this recognition?

To re-apply for Asthma-Friendly Provider Recognition, providers must:

- (1) Review the Asthma-Friendly Provider Recertification Application and implement criteria for the desired recognition level
- (2) Complete the application and submit to: FLAsthmaCoalition@gmail.com
- (3) Email copies of certificate from the <https://www.resinsightslive.com> training
- (4) Email copies of the Asthma Action Plan Template being utilized along with a policy or protocol for its distribution, if applying for Silver or above
- (5) Email copies of policy, curriculum, and materials for criterion 4, if applying for Silver or above
- (6) Email copies of protocol or policies for criterion 5, if applying for Gold

Bronze

Criterion 1: Professional Development

If there is a new asthma team lead, they will need to complete the [Asthma Management and Education Online Course \(AME-O\)](#). Upon completion, attach the certificate to the application.

If there are any new medical assistants, they will need to complete the [American Lung Association's "Asthma Basics"](#) (free online course). Upon completion, attach the certificate to the application.

Complete the "Applying the Latest Guidelines and Recommendations to Initiate Biologic Therapy and Control Moderate-to-Severe Asthma Symptoms" training available at <https://www.resinsightslive.com>. A free account must be created, which will allow access to 1 CME credit. This resource will be available until May 31st, 2023. Upon completion, attach the certificate to the application.

Criterion 2: Team Based Approach

Staff use a team-based approach to promote more efficient, comprehensive, and patient-centered care so as to align services across the asthma care continuum. **Answering the questions below is required.**

Brief description of population served using a team-based approach (limit 500 characters)

Composition of team(s) and role of team members (limit 500 characters)

Method of sharing information among team members

Measures taken to ensure cultural appropriateness (if available)

Additional comments (limit 750 characters)

Silver

Criterion 3: Asthma Action Plans

All patients with a diagnosis of persistent asthma receive an Asthma Action Plan and are provided with instructions on how to comply with the plan. *Attach a copy of the Asthma Action Plan template being utilized AND a copy of the policy or protocol for its distribution.*

All Asthma Action Plans are required to have the following components:

- A list of triggers that may cause an asthma attack to inform the patient what triggers to avoid
- Recognition of symptoms and treatment of worsening/severe asthma
- What medicine to take daily, including the specific names of the medications

Gold

Criterion 4: Self-Management Education

All patients with moderate or severe, persistent asthma are provided with, or referred to, self-management education that meet EPR-3 Guidelines *Attach a copy of the curriculum used and materials given to patients AND a copy of the policy or protocol for referring patients. Answering the questions below is required.*

Recommendations for adults and children with asthma include:

- Clinicians must provide all asthma patients with asthma self-management education that includes asthma information and training in asthma management skills, symptom-based or peak flow-based self-monitoring, development of a written Asthma Action Plan and regular consistent assessment.
- Clinicians must involve patients in decisions about the type of self-monitoring (symptom-based or peak-flow based) of asthma control that they will conduct.
- Health professionals, such as clinicians, nurses, asthma-educators, etc., should be trained in asthma self-management education and implement and teach asthma self-management skills.
- Essential skills of self-management should be introduced in the first sessions of asthma self-management education and subsequent sessions should focus on tailoring and adjusting management to the needs of the patient.

Description of referral process and the services referred to (limit 500 characters):

Description of the assessment of referral timeliness and completion (if available):

Brief description of population provided with, or referred to, asthma self-management education (limit 500 characters):

Criterion 5: Multi-Component Home Based Asthma Education

All patients with severe, persistent asthma are provided information about, or referred to, multi-component home-based asthma management education. If there is not a program available to refer patients to, the asthma team is required to review and distribute the [Florida Asthma Coalition Home Visiting Informational Packet](#) to all patients with severe, persistent asthma. Attach a copy of the policy or protocol for providing patients with home-based education or for referring patients.

Answering the questions below is required.

Description of referral process and the services referred to (limit 500 characters):

Description of the assessment of referral timeliness and completion (if available):

Brief description of population provided with information about, or referred to, a multi-component home-based asthma management education program (limit 500 characters):

Comments for both Criterion 5 & 6 (750 character limit):

Platinum

Criterion 6: Implementing an Asthma Quality Improvement Process

Health care providers serving populations with a disproportionate burden of asthma will implement an asthma quality-improvement process, following EPR-3 guidelines, to improve the quality of care and health outcomes of moderate/severe asthmatic patients. *See resources on page 6 for a guide and workbook to help get started; It is not required for providers/groups to collaborate with any government entity to complete this criterion.*

Brief description of the population receiving guidelines-based asthma care, or those whose QOC measures are collected.

Name/description of Quality Improvement (QI) process (limit 1,00 characters)

Asthma related Quality of Care (QOC) measures collected (if available) (limit 1,500 characters)

Check all health outcomes collected (if available):

Asthma control

Hospitalizations/ emergency department visits

Satisfaction with care

Asthma-related quality of life

Other, please describe below:

Additional comments you would like to add (limit 750 characters)

Resources:

Criterion 1:

- **Asthma and Allergy Foundation of America's (AAFA) Asthma Management and Education Training**
(Please contact the Florida Asthma Coalition to request access to this course) This course recognizes the critical role allied health professionals play in educating and caring for patients with asthma. Course content conforms with the National Asthma Education and Prevention Program (NAEPP) 2007 Expert Panel Report 3: Guidelines for the Diagnosis and Management of Asthma. This free program contains 11 modules of self-paced study. Upon completion of the full course, team lead will be eligible to earn 8.75 continuing education credits from the American Nurses' Credentialing Center's Commission on Accreditation (ANCC) and the American Association for Respiratory Care (AARC). <https://www.aafa.org/continuing-education-for-health-care-professionals/>
- **The American Lung Association's Asthma Basics Course**
The American Lung Association's Asthma Basics course is a free one-hour interactive online learning module designed to help people learn more about asthma. This course is ideal for frontline healthcare professionals, such as school nurses or community health workers, as well as individuals with asthma, parents of children with asthma, and co-workers, friends and family who want to learn more about asthma. <http://www.lung.org/lung-health-and-diseases/lung-disease-lookup/asthma/asthma-education-advocacy/asthma-basics.html>
- **Targeting Asthma: Community-Based Strategies to Enhance Care Access for Children, Adolescents, and Adults – Focus on Social Determinants of Health and Inequities in Care**
ResInsightsLive.com is an online CME learning platform that includes all of the features of a live medical conference, including live streaming video lectures, panel discussions and case presentations as well as interactive activities such as real-time question and answer sessions with top faculty and other participants. Please note that 1 CME will be available upon completion of the training. This resource will be available until May 31st, 2023.

Criterion 3:

- **Allergy & Asthma Network Asthma Action Plans**
Available in English and Spanish, which can be found on their website using the link below. <https://allergyasthmanetwork.org/what-is-asthma/asthma-action-plan/>
- **American Lung Association: Asthma Action Plans**
Additionally, the American Lung Association developed an Asthma Action Plan, available in English and Spanish, through the Florida Department of Health website. The Asthma Action Plan can be found using the link below: <http://www.floridahealth.gov/diseases-and-conditions/asthma/documents/afcc-appendix-a.pdf>

Criterion 4:

- **Asthma Inhaler Videos**
Asthma can be controlled and asthma attacks can be avoided by taking medications as prescribed by the provider. The videos and documents provided on the link below demonstrate how to properly use inhalers.
Using a metered dose inhaler with a spacer: <https://youtu.be/BbONuRXJdr0>
Using a metered dose inhaler (inhaler in mouth): https://youtu.be/Lx_e5nXfi5w
Español:
Cómo usar inhalador con espaciador: <https://youtu.be/NdFstn28hWM>
Cómo usar inhalador en la boca: <https://youtu.be/TFexVuJeJVk>
- **Asthma and Allergy Foundation of America - Education Programs for Teaching Patients**
Asthma and Allergy Foundation of America (AAFA) offers many patient education programs for all ages in English and Spanish, including Wee Breathers, an interactive program for health professionals who teach parents of young children about managing asthma. <http://www.aafa.org/page/asthma-allergy-education-programs-teach-patients.aspx>
- **NAEPP Guidelines for the Diagnosis and Management of Asthma (EPR-3)**
The National Asthma Education and Prevention Program (NAEPP), coordinated by the National Heart, Lung, and Blood Institute (NHLBI), convened an expert panel in 2007 to complete a systematic review of the published medical literature and to update the asthma guidelines to reflect the latest scientific advances. This document provides new guidance for selecting treatment based on a patient's individual needs and level of asthma control. The guidelines emphasize that while asthma can be controlled, the condition can change over time and differs among individuals and by age groups, emphasizing the importance of regularly monitoring the patient's level of asthma control and adjusting treatment as needed. <https://www.nhlbi.nih.gov/health-topics/guidelines-for-diagnosis-management-of-asthma>
- Guidelines Quick Reference Guide: https://www.nhlbi.nih.gov/sites/default/files/media/docs/asthma_qrg_0_0.pdf

Criterion 5:

- **Asthma Home Visiting Informational Packet**

This [informational packet](#) was created by the Florida Asthma Coalition's Home Visiting Workgroup and can be used as a reliable tool and resource for health care professionals during Home Visits. This handout is also useful for individuals and their caregivers living with asthma to learn ways to avoid and prevent asthma triggers in the home setting.

- **Environmental Protection Agency: Asthma Home Environment Checklist**

The EPA's asthma home environment checklist guides individuals with asthma and home care visitors in identifying environmental asthma triggers most commonly found in homes. It includes sections on the building, home interior and room interior and provides low-cost action steps for remediation.

<http://www.epa.gov/asthma/asthma-home-environment-checklist>

Criterion 6:

- **Agency for Healthcare Research and Quality: Asthma Care Quality Improvement (AHRQ): A Resource Guide and Workbook for State Action**

The Agency for Healthcare Research and Quality (AHRQ) has developed Asthma Care Quality Improvement: A Resource Guide for State Action and its companion workbook, Asthma Care Quality Improvement: A Workbook for State Action. These materials were designed in partnership with the Council of State Governments to help States assess the quality of asthma care and create quality improvement strategies.
